Thanks for sending this -- I wondered if there was a plan involved... Elliott hasn't received the analytical results from the Argentine Tunnel samples so I am following up since he's at a different site this week. I'll send the results to you when I get them.

It sounds like a good idea to inject dye into the R&B – I assume it's to determine the fate of water in the R&B such as seepage, connection with Gold King and other discharges, etc. The more difficult part will be determining where and when to sample but you may have worked that out already.

**Subject:** Argentine Pool Tracer Test - Technical Memo

All,

Please find the attached technical memorandum and supporting documents regarding the protocols to conduct a tracer test at the Rico Argentine Mine. Please feel free to contact Jim Fricke or Dan Dean with any comments.

Thank you,

Lyndsey Fox
